Research Methodology (12 point)

1. The Research Procedure Includes 5 Steps which are:

1.1 To study the possibility and to specify the problems of the systems.....(Times new roman)
size 12 point)

1.2 To analyze the data obtained from the 1 step through the analysis of.....(Times new roman)
size 12 point)

1.3 To design the system through the development of.....(Times new roman) size 12 point)

1.4 To develop the system from(Times new roman) size 12 point)

1.5 To collect, analyze, summarize, and develop the handbook of the system.....(Times new
roman) size 12 point)

2. Research Instrument (s)

2.1 System.....(Times new roman) size 12 point)

2.2 Questionnaire of Quality Assessment (Times new roman) size 12 point

2.3 Questionnaire of Satisfaction(Times new roman) size 12 point)

3. Target Group / Populations and Samples (Please choose one)

3.1 Populations were (please specify the numbers)..... (Times new roman) size 12
point)

3.2 Samples were.....(Times new roman) size 12
point) (please specify the sampling)

4. Statistics for Data Analysis The statistics used for analyzing data were mean, percentage, standard deviation, and t-test (Dependent Sample). The obtained results will be compared with the assessment criteria of Areerat (2007) as follow: (Please refer to the criteria adopted in article)

The mean score 4.50 – 5.00 refers to the most appropriate

The mean score 3.50 – 3.49 refers to the most appropriate

The mean score 2.50 – 3.49 refers to the most appropriate

The mean score 1.50 – 2.49 refers to the most appropriate

The mean score 1.00 – 1.49 refers to the most appropriate (Times new roman)
size 12 point

Results/Research (12 point)

(Write the results based in the research objectives)

1. The results of the development of the system.....(Times new roman) size 12 point)

The researcher has developed the system..... according to the
research process in Phase 1, data from the study and analysis were used to create a
system.....and tools of activities shown in Figure 1 (Times new roman) size 12 point)

Figure 1 The system of
(Centered in an inverted triangle shape)

From picture 1, system.....
..... together with.....
..... (Times new roman) size 12 point)

**2. The results of the system trails (Times new roman)
size 12 point)**

The researcher conducted a trial of the system..... that developed with 30
undergraduate students majoring in Computer and Communication Technology. The pre – test was
employed before the learning while the post - test and student satisfaction on the developed system
were investigated after the learning. The results were, then, analyzed by using basic statistics through the
comparison to the committed criteria to summarize the findings as shown in Table 1 (Times new roman)
size 12 point)

Table 1

Details	\bar{X}	S.D.	Level
1. Statement	xxx	xxx	Statement
2. Statement	xxx	xxx	Statement
3. Statement	xxx	xxx	Statement
Total	xxx	xxx	Statement

From Table 1, the results of showed that (Times new roman) size 12 point)

3. The results of (Times new roman) size 12 point)

The researcher distributed the questionnaire on of students towards the system..... after the learning activities have been completed. The results of the questionnaires were, then, analyzed by using the basic statistics to compare the results with the committed criteria to summarize the findings as shown in Table 2 (Times new roman) size 12 point)

Table 2

Details	\bar{X}	S.D.	Level
1. Statement	xxx	xxx	Statement
2. Statement	xxx	xxx	Statement
3. Statement	xxx	xxx	Statement
Total	xxx	xxx	Statement

According to Table 2,the results.....showed that (Times new roman) size 12 point)

Discussion (12 point)
